

CONTENT

With an academic approach, the text should deal with significant issues concerning the international state of affairs —from political, economic or social point of view— while bringing to the fore, through the use of current data, significant problems, trends, points of views, etc., and combining information and analysis of the topic discussed.

The paper submitted must be **original, unpublished** and must represent a real contribution to scientific knowledge in the area of study.

COPYRIGHT AND LANGUAGE

The copyright of the texts accepted become the property of CIDOB and the texts cannot be reproduced without CIDOB's authorization. The **texts are published in Spanish language**. Once the printed copy has been produced, the articles will be published in the electronic version of CIDOB's website under Creative Commons license.

With regard to the **original version in English** (if the author agrees to publish it on the journal website; this is optional) we kindly ask him/her to go through the Spanish edited version and adapt the changes to the English version of the article (those which are applicable). **It is important that the English text is proofread** by a third party.

EVALUATION – PEER REVIEW

Following an initial evaluation by the Editorial Board or scientific coordinators, all the articles will be subjected to a process of external “double blind” peer review.

After the evaluation process is completed, authors will receive one of four different responses: rejection (the paper can't be submitted again); approval of the manuscript (it will be published); conditioned (minimum changes); conditioned (major changes, the re-drafting of certain aspects will be proposed with the aim of re-evaluating the article for publication).

Authors may not submit their manuscript to any other publishing companies while it is in the process of evaluation.

We will try to send an answer before 5 or 6 weeks.

TITLE

The title should be a concise indication of content. It can be followed by a

subtitle which may only contain complementary information: **10-12 words maximum (90 characters with spaces)**, both included.

LENGTH AND SUBMISSION

7,000 words, footnotes and references included ($\pm 10\%$).

The author will submit a brief CV and his/her telephone number, address institutional post or place of work. Please, an e-mail address for publication, as well as the ORCID number/code must be included.

The author is to submit an **abstract** of its content, maximum **120 words** in one paragraph, as well as 4-6 key words.

The manuscript must contain an **introduction providing the historical context and the analytical framework**, a main **section** in which the subject covered is developed and analysed (we recommend subdividing it into thematic sections separated by subtitles), a **conclusions section gathering the main ideas and the results of the study** and, finally, the **bibliographical reference** at the end of the document.

One-colour tables or graphs will be accepted. Please limit the number used. Submit in **Excel format**.

Submitted papers for review will be accepted in Spanish and English languages.

CRITERIA FOR PUBLICATION

Before printing, the proofs will be sent in electronic format to authors (or, failing that, the issue co-ordinator) in order to check them and, if necessary, to correct possible mistakes. These proofs must be returned within one week from the date on which they are sent. No substantial modifications or alterations may be made to the content of any text that has been approved for publication.

The Editorial Board reserves the right to modify the format of acronyms, initials, bibliographic references, notes, official titles, etc. in the interest of the overall uniformity required by a periodical publication. We therefore request authors to observe the following guidelines:

1. Acronyms and initials

When acronyms or initials are cited for the first time in the article, include their complete equivalent in parentheses.

2. Footnotes

Do not confuse footnotes with bibliographic references. They must only be used in exceptional cases. Footnotes are used to clarify or complement aspects of the content of the text. If the footnote needs to be *referenced*, the author's surname, the year and the page should be added in brackets (i.e. Innerarity, 2009: 26). List footnotes at the end of the text or at the bottom of the page. Please include no more than 25-30 footnotes.

3. Bibliographic references

We implement the norm ISO 690-1987 in bibliographic references and citations.

Group these alphabetically at the end of the text. In the body of the text, place the reference in parentheses indicating only the cited author's surname, the year of publication and the page: (Barbé, 2006: 32) or (Krastev *et al.* 2010: 108).
